The Combikey button family of TSL ESCHA meets the highest requirements of durability with an unbreakable, robust housing construction. Since these buttons are used on road and rail transportation vehicles, they are exposed to most adverse environmental conditions. They are suitable for outdoor applications and thus steadily proven under frost, heat, dirt, and humidity.

In order to ensure maximum reliability, the Combikey buttons are manufactured with metal components. They are not only tested against graffiti removers but also resistant to aggressive cleaning chemicals. Furthermore, pictographs are proven against wear or vandalism.

Stainless steel button panel

Metal button surface

Pictograph

Transparent protective cover (PC)

Endless combinations of switching functions, touch surfaces, mounting rings, LED colors, and pictographs make the Combikey a versatile button family. Its great selection allows for the creation of personalized and extremely robust products. Since decades, buses, light rails, subways, and high-speed trains drive around the world with Combikey buttons that have proven high durability.

Thanks to the integrated microcontroller of high-tech electronics, a number of different functions can be easily implemented in Combikey buttons, including but not limited to blinking lights and sound sequences.

HIGHLIGHTS AT A GLANCE

CONFIGURATION

CONSTRUCTION TYPES

Six different engineering designs of the Combikey Series allow this product family to be installed in various areas of application.

CONSTRUCTION TYPE 1

Function: Double-sided
 Description: Inner push button assembly on exterior button with screws. Wireless connection between the two buttons is possible thanks to a built-in connector with distance compensation
 Applications: Wall installation for three different wall thickness min. 29mm - max. 44mm

Wall installation

CONSTRUCTION TYPE 2

Function: Double-sided
 Description: Inner push button (pre-assembly with space ring) assembly on exterior button with screws. Wireless connection between the two buttons is possible thanks to a built-in connector with distance compensation
 Applications: Glass door, door thickness from 4mm - 8mm

Glass door installation with space ring

Configuration Status "Construction and Mounting Type"

CONSTRUCTION TYPE 3

Function: 1-sided

Description: Rear assembly with housing cover without visible front screws

Applications: Glass door, door thickness from 3.5mm - 6mm

Glass door installation

CONSTRUCTION TYPE 4

Function: 1-sided

Description: Front button assembly with Zentraflex fixing ring. Screw less flush-mounted installation

Applications: Exterior bus or wagon doors, door thickness 1.5mm (3mm upon request)

CK button with Zentraflex ring on wall

IT'S ALL ABOUT
THE DETAILS

CONFIGURATION

CONSTRUCTION TYPE 5

Function: 1-sided
 Description: Front button assembly with rear wall fastening with auto-adjusting fixing claws
 Applications: Wall or boarding door

CK – Wall installation with fixing claws

CONSTRUCTION TYPE 6

Function: 1-sided
 Description: Front button assembly with front panel and visible screws
 Applications: Indoor or outdoor and for mounting on minimal depth

Visible front panel screws

FEEL THE
INFORMATION

CONFIGURATION

Some light and sound signal examples are presented on the following pages.

Different light and sound signals are triggered accordingly as programmed in the button. However, it is also possible to trigger functions by an external controller. For this purpose, the Combikey Series has three inputs; In1, In2, and In3.

To better exemplify, it is possible to disable the button during night hours, indicate a door out of service, or shut off the orientation tone at night. The possibilities are as varied as the application requirements.

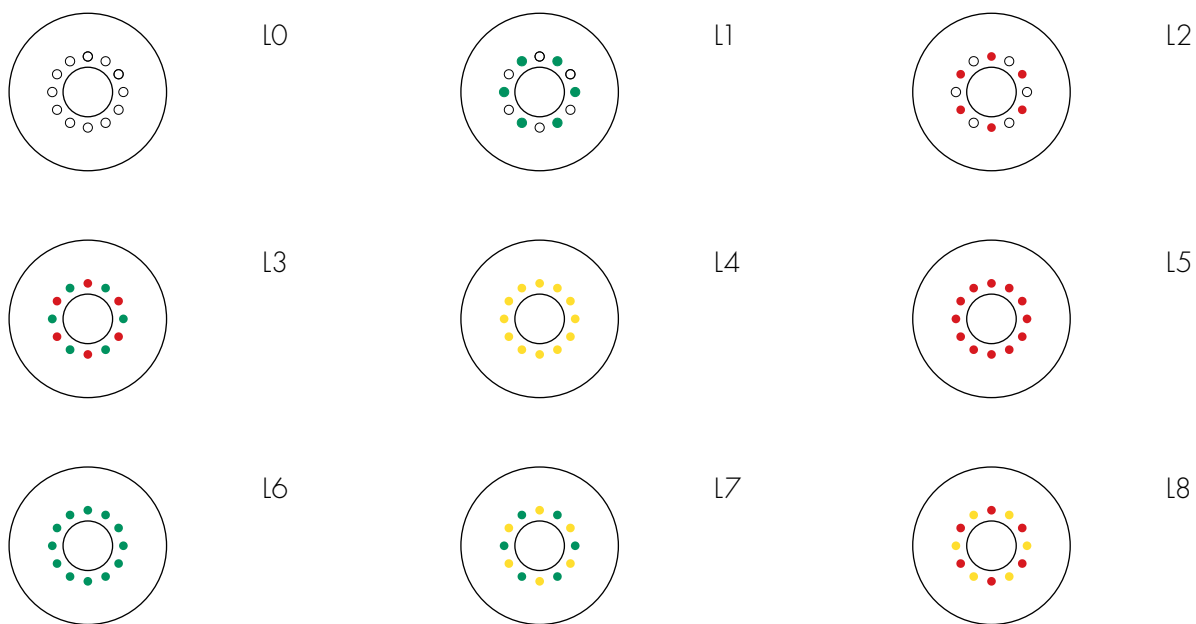

The combination of light, sound, and input signals as well as the desired functionality of the output are custom-built.

The following tables show some of the many possibilities of the Combikey Series. Each table stands for a custom-made button parameter, and it describes the light and sound of each operational status.

LIGHT AND SOUND SIGNALS

The Combikey Series offers a wide variety of light and sound signals. The following table shows a selection of standard versions. Other variations are available upon request.

LIGHT SIGNALS

SOUND SIGNALS

The maximum sound pressure of the CK is 53dBA at one meter distance.

	A0	A1	A2	A3
Tone frequency:	-	3.5 kHz	3.8 kHz	3.5 kHz
Tone length:	-	0.5 sec.	0.05 sec.	Unlimited
Interval:	-	1-time	0.5 Hz	-
Description:	-	Confirmation	Orientation	Prolonged
